

JButton

ActionListener

it.emarolab.cagg.debugging.base
Components.PanelTabButton.TabButton

```
graph BT; TabButton[\"it.emarolab.cagg.debugging.base  
Components.PanelTabButton.TabButton\"] --> JButton[JButton]; TabButton --> ActionListener[ActionListener];
```

The diagram illustrates a class hierarchy. At the bottom is a gray box representing the base class: `it.emarolab.cagg.debugging.base Components.PanelTabButton.TabButton`. Two blue arrows point upwards from this box to two white boxes above it. The left white box is labeled `JButton`, and the right white box is labeled `ActionListener`. This indicates that `TabButton` inherits from both `JButton` and `ActionListener`.
